SMALL BUSINESS CONTRACT
EP-W-13-016**

TITLE: Citizens' Guides to Site Cleanup Technologies
TO Number: 27

TASK ORDER STATEMENT OF WORK (REVISED)

I. BACKGROUND

The mission of EPA is to protect human health and the environment. OSWER is an Agency component that is responsible for programs articulated under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, or Superfund) of 1980, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986; the Resource Conservation and Recovery Act (RCRA) and amendments; and other legislation and Agency directives related to the characterization, remediation, and monitoring of solid and hazardous wastes. OSWER provides policy, guidance and direction for the Agency's emergency response and waste programs. It develops guidelines for the land disposal of hazardous waste and underground storage tanks. It provides technical assistance to all levels of government to establish safe practices in waste management. It administers the Brownfields program, which supports state and local governments in redeveloping and reusing potentially contaminated sites. It also manages the Superfund program, which responds to abandoned and active hazardous waste sites and accidental oil and chemical releases. Finally, it encourages innovative technologies to address contaminated soil and groundwater.

The mission of the Office of Superfund Remediation and Technology Innovation (OSRTI) is to return contaminated areas of land associated with Superfund sites to communities for safe reuse in a healthy environment. The purpose of the OSRTI Management and Analytical Support Contract is to provide support primarily to the OSRTI program in the planning, management and oversight of the program authorized under CERCLA and SARA. The contractor will provide support to the three OSRTI divisions: the Technology Innovation and Field Services Division (TIFSD), the Assessment and Remediation Division (ARD), and the Resource Management Division (RMD).

OSRTI requires contractor assistance with planning, management, and oversight. Contract services are anticipated in the following areas: strategic planning and analysis; performance and reporting requirements; regulatory and legislative analysis; support and development of guidance documents; training, conference, and meeting support; technical analysis and research and technical information transfer and coordination; resources management and information management analysis and support; and communications, including community/public outreach and environmental justice activities analysis.

II. SCOPE OF WORK

The scope of this Task Order is (1) update 22 2-page Citizens' Guides to Technologies published in 2012; and (2) to develop 6 new 2-page guides on new technologies. This effort pertains to the English language guides only.

Work to be performed under this Task Order aligns with the following Task Areas of the contract Statement of Work: Performance Task 3: Conducting technical research and supporting transfer of technical information.

No travel is anticipated for this task order. Meetings will be by conference call.

III. PERIOD OF PERFORMANCE

The period of performance for the Base Period shall be date of award through March 2, 2019.

IV. TASKS

TASK #1 Prepare Schedule

The contractor will prepare a schedule for updating the 22 existing guides and developing 6 new guides. The schedule will include deliverables of several guides at the same time to pace the contractor's work and EPA's review. Generally, the contractor will provide revised or final documents two weeks after receipt of EPA comments.

Task #2 Update Existing Citizens' Guides

EPA will provide the contractor with EPA comments on the 22 existing guides. EPA intends to reach out to EPA technology experts for review and will compile EPA comments before providing to the contractor. The contractor will incorporate the revisions and any additional comments to EPA in a first draft of each guide in redline/strikeout format. After EPA reviews, the contractor will format the guides in a second draft for final EPA review. The contractor will incorporate any final comments and finalize the guides. Once EPA approves to post, the contractor will develop the 508-compliant guides for posting.

TASK #3 Prepare Six New Guides

The contractor will draft and finalize 6 new 2-page guides. The proposed guides are: in situ carbon amendments, soil amendments, bioreactors for mine-influenced waters, horizontal drilling, groundwater recirculation, and one still to be determined.

The new guides will follow the format of the existing guides, with the following subsections: What is Technology Name; How Does It Work; How Long Does It Take; Is Technology Name Safe; How Might It Affect Me; and Why Use Technology Name. Each guide typically will have one case study in a side bar, a technology schematic, and one or two pictures of the technology being used in the field. As with updated guides, there will be first draft, second draft, and final version of the new guides. Once EPA approves to post, the contractor will develop the 508-compliant guides for posting.

V. DELIVERABLE SCHEDULE

DELIVERABLE	DUE DATE
Schedule	2 weeks after approval of technical and cost proposals
First Draft of Updated and New Guides	According to approved schedule
Second Draft of Updated and New Guides	
Final Updated and New Guides	
508-Compliant Guides	

VI. POINTS OF CONTACT

Task Order Contract Officer Representative (TOCOR)

Name: Cindy Frickle

Office: USEPA OSWER/OSRTI/TIFSD/TAB, 1200 Pennsylvania Ave., Washington D.C. 20460

Phone: 703-603-8763

Fax: 703-603-9116

Email: frickle.cynthia@epa.gov

Alternate Task Order Contract Officer Representative (ATOCOR)

Name: Linda Fiedler

Office: USEPA OSWER/OSRTI/TIFSD/TAB, 1200 Pennsylvania Ave., Washington D.C. 20460

Phone: 703-603-7194

Fax: 703-603-9116

Email: fiedler.linda@epa.gov

VII. TERMS AND CONDITIONS

The following additional terms and conditions are requirements of this task order:

52.204-25 Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment.

As prescribed in 4.2105(b) and in the applicability instructions in interim FAR Case 2019-009, insert the following clause:

Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment (Aug 2020)

(a) Definitions. As used in this clause—

Backhaul means intermediate links between the core network, or backbone network, and the small subnetworks at the edge of the network (e.g., connecting cell phones/towers to the core telephone network). Backhaul can be wireless (e.g., microwave) or wired (e.g., fiber optic, coaxial cable, Ethernet).

Covered foreign country means The People's Republic of China.

Covered telecommunications equipment or services means—

(1) Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities);

(2) For the purpose of public safety, security of Government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities);

(3) Telecommunications or video surveillance services provided by such entities or using such equipment; or

(4) Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.

Critical technology means—

(1) Defense articles or defense services included on the United States Munitions List set forth in the International Traffic in Arms Regulations under subchapter M of chapter I of title 22, Code of Federal Regulations;

(2) Items included on the Commerce Control List set forth in Supplement No. 1 to part 774 of the Export Administration Regulations under subchapter C of chapter VII of title 15, Code of Federal Regulations, and controlled-

(i) Pursuant to multilateral regimes, including for reasons relating to national security, chemical and biological weapons proliferation, nuclear nonproliferation, or missile technology; or

(ii) For reasons relating to regional stability or surreptitious listening;

(3) Specially designed and prepared nuclear equipment, parts and components, materials, software, and technology covered by part 810 of title 10, Code of Federal Regulations (relating to assistance to foreign atomic energy activities);

(4) Nuclear facilities, equipment, and material covered by part 110 of title 10, Code of Federal Regulations (relating to export and import of nuclear equipment and material);

(5) Select agents and toxins covered by part 331 of title 7, Code of Federal Regulations, part 121 of title 9 of such Code, or part 73 of title 42 of such Code; or

(6) Emerging and foundational technologies controlled pursuant to section 1758 of the Export Control Reform Act of 2018 (50 U.S.C. 4817).

Interconnection arrangements means arrangements governing the physical connection of two or more networks to allow the use of another's network to hand off traffic where it is ultimately delivered (e.g., connection of a customer of telephone provider A to a customer of telephone company B) or sharing data and other information resources.

Reasonable inquiry means an inquiry designed to uncover any information in the entity's possession about the identity of the producer or provider of covered telecommunications equipment or services used by the entity that excludes the need to include an internal or third-party audit.

Roaming means cellular communications services (e.g., voice, video, data) received from a visited network when unable to connect to the facilities of the home network either because signal coverage is too weak or because traffic is too high.

Substantial or essential component means any component necessary for the proper function or performance of a piece of equipment, system, or service.

(b) Prohibition. (1) Section 889(a)(1)(A) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Pub. L. 115-232) prohibits the head of an executive agency on or after August 13, 2019, from procuring or obtaining, or extending or renewing a contract to procure or obtain, any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. The Contractor is prohibited from providing to the Government any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system, unless an exception at paragraph (c) of this clause applies or the covered telecommunication equipment or services are covered by a waiver described in FAR 4.2104.

(2) Section 889(a)(1)(B) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Pub. L. 115-232) prohibits the head of an executive agency on or after August 13, 2020, from entering into a contract, or extending or renewing a contract, with an entity that uses any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system, unless an exception at paragraph (c) of this clause applies or the covered telecommunication equipment or services are covered by a waiver described in FAR 4.2104. This prohibition applies to the use of covered telecommunications equipment or services, regardless of whether that use is in performance of work under a Federal contract.

(c) *Exceptions.* This clause does not prohibit contractors from providing—

(1) A service that connects to the facilities of a third-party, such as backhaul, roaming, or interconnection arrangements; or

(2) Telecommunications equipment that cannot route or redirect user data traffic or permit visibility into any user data or packets that such equipment transmits or otherwise handles.

(d) Reporting requirement.

(1) In the event the Contractor identifies covered telecommunications equipment or services used as a substantial or essential component of any system, or as critical technology as part of any system, during contract performance, or the Contractor is notified of such by a subcontractor at any tier or by any other source, the Contractor shall report the information in paragraph (d)(2) of this clause to the Contracting Officer, unless elsewhere in this contract are established procedures for reporting the information; in the case of the Department of Defense, the Contractor shall report to the website at <https://dibnet.dod.mil>. For indefinite delivery contracts, the Contractor shall report to the Contracting Officer for the indefinite delivery contract and the Contracting Officer(s) for any affected order or, in the case of the Department of Defense, identify both the indefinite delivery contract and any affected orders in the report provided at <https://dibnet.dod.mil>.

(2) The Contractor shall report the following information pursuant to paragraph (d)(1) of this clause

(i) Within one business day from the date of such identification or notification: the contract number; the order number(s), if applicable; supplier name; supplier unique entity identifier (if known); supplier Commercial and Government Entity (CAGE) code (if known); brand; model number (original equipment manufacturer number, manufacturer part number, or wholesaler number); item description; and any readily available information about mitigation actions undertaken or recommended.

(ii) Within 10 business days of submitting the information in paragraph (d)(2)(i) of this clause: any further available information about mitigation actions undertaken or recommended. In addition, the Contractor shall describe the efforts it undertook to prevent use or submission of covered telecommunications equipment or services, and any additional efforts that will be incorporated to prevent future use or submission of covered telecommunications equipment or services.

(e) *Subcontracts*. The Contractor shall insert the substance of this clause, including this paragraph (e) and excluding paragraph (b)(2), in all subcontracts and other contractual instruments, including subcontracts for the acquisition of commercial items.

(End of clause)
